CRYSTAL CAVERNS was discovered about 120 years ago and has been opened to the public since 1924. A Historical Marker is near the entrance way. CRYSTAL CAVERNS has more different kinds of formations than any other cave in Missouri, with some of the rare formations being black stalactites, aragonite crystals, and calcite ice. One room has an entire ceiling of crinoid and brachpoid fossils. The temperature is 54. CRYSTAL CAVERNS under new management is electrically lighted and has a new entrance leading from the Gift Shop and Snack Bar. Modern Restrooms and a Picnic area are located on the grounds. Educational tours are given by the guides. The admission price is \$1.00 with those under 6 admitted free. Overnight camping is available.
